

Philip Muhuri

Professional Writer | Web Developer | Data Analyst

75202, Nairobi, Kenya, 00100 | +254 718 856 850 | philipmuhuri@gmail.com

Professional Summary

I am a Professional Writer, Web Developer & Data Specialist with extensive experience in creating engaging online content. Successfully implemented SEO strategies that boosted organic traffic by 50%, helping to elevate the website in search rankings. Additionally, collaborated with designers to enhance user experience, resulting in a 30% reduction in bounce rates. With a passion for excellence, attention to detail, and expertise in Content creation, Proofreading and Editing, Resume/CV development, and Web design, I help clients create compelling narratives and digital solutions that make a lasting impression.

Employment History

Freelance Professional Writer, Mar 2024 - Present

Nairobi

- Delivered high-quality content across niches, including blog articles, academic papers, resumes, and technical documentation, ensuring clarity and engagement.
- Collaborated with diverse clients to tailor content to brand voice, SEO requirements, and audience needs, boosting readability and conversions.
- Produced error-free, well-researched, and plagiarism-free work under tight deadlines, maintaining a 95%+ client satisfaction rate.
- Optimized content for search engines and readability, increasing organic traffic for clients by up to 50%.

Associate Data Scientist, Feb 2021 - Nov 2023

Cloudflare, Inc., Johannesburg

- Enhanced web performance and security for global clients by optimizing Cloudflare's CDN, DDoS protection, and edge computing solutions.
- Collaborated cross-functionally to implement scalable network infrastructure, improving uptime and reducing latency.
- Supported enterprise customers with troubleshooting, configuration, and best practices to maximize platform efficiency.
- Contributed to a 20% reduction in client-side security incidents.

Website & Portfolio Developer, Jan 2019 - Dec 2020

Meta, Boston

- Designed and developed high-performance, responsive websites and portfolios for clients, ensuring optimal UX/UI, accessibility, and cross-browser compatibility.
- Leveraged HTML5, CSS3, JavaScript (React/Next.js), and WordPress to build scalable, SEO-optimized sites, improving client visibility and engagement.
- Collaborated with designers, marketers, and stakeholders to translate brand vision into functional, visually compelling digital experiences.
- Optimized page load speeds by 30%+ through image compression, lazy loading, and CDN integration (e.g., Cloudflare).
- Implemented analytics tracking (Google Analytics, Hotjar) to monitor user behavior and drive data-driven design improvements.

Education

MSc in Data Science, Jan 2019 - Mar 2021

Stanford University, Stanford, CA

- Specialized in machine learning, big data analytics, and statistical modeling.
- Thesis/Capstone: AI-driven predictive maintenance for IoT systems.

BSc in Computer Science, Aug 2018 - Sep 2022

University of Nairobi, Nairobi

- Focused on algorithms, software development, and database systems.
- Key Projects: Developed a scalable student management system using Python.

High School Diploma, Jan 2014 - Dec 2017

Alliance High School, Nairobi
